Operating Areas of ORCD in Afghanistan

Provision of essential and lifesaving reproductive services for women of reproductive age in need affected by the emergencies in white and hard to reach areas

This project was funded by the United Nation Population Fund (UNFPA) with overall objective of increasing access to RMNCH and PSS Services in hard-to-reach areas by establishing of 61 Mobile Health Teams (MHTs) in Badakhshan (10 MHTs), Kunduz (5 MHTs), Baghlan (10 MHTs), Balkh (10 MHTs), Nuristan (16 MHTs), and Nangarhar (10 MHTs). Priority activities for the implementation were 1) Provision of RMNCH services, 2) Provision of Winterization Kit 3) Integration of PSS in MHT 4) Provision of emergency SRH, and PSS prevention and response and psychosocial services in underserved and hard to reach areas. The project initial phase duration was three months from the 1st of Oct to 31st of Dec 2023.

The main achievements of the project were the establishment and set up of six provincial offices, recruitment of all project staff, establishing of 61 MHTs in the inception phase of the project, the project objective and scope of services were presented to project staff, relevant PHDs, DHOs and other stakeholders in the orientation sessions were held for these purposes. Totally 205,694.00 people including men, women, boys and girls benefited from the RMNCH and PSS Services provided by 61 MHTs in hard-to-reach areas of the six mentioned provinces. In addition, 46904 families benefited from the winterization kits. Moreover, 122 well-furnished connexes installed in 61 Service Deliveries Points (SDP). The project activities and services delivery were monitored and the required reports including MIAR, weekly, monthly, and quarterly work plan progress reports were submitted.

Figure 1: Figure 1 & 2: Normal Twin Delivery by Argo MHT-2 midwife.

Provision of essential and lifesaving Health & Nutrition services for Women and children and their care givers in need affected by the emergency in Afghanistan through health and nutrition mobile teams and health facilities.

The proposed project, chiefly focused on hard-to-reach areas, solely implemented by ORCD as the Mobile Health and Nutrition Teams (MHNTs) implementing partner of Ministry of Public Health (MoPH) in Logar province targeted drought affected population in white areas without created any duplication and without created pull factors provided them at the place of origin. The project implemented in Pul Alam, Baraki Barak, Kharwar and Azra districts specifically addressed under 5 children and Pregnant and Lactating women. The program interventions related to nutrition as part of this project were based on a comprehensive need assessment conducted by a team comprised of male and female experts. The project duration is one year started June 01, 2022.

ORCD establish five MHTs by deploying 7 staff in each as per the guideline (1 midwife, 1 MD, 1 Vaccinator, 1 Nutrition Counsellor, 1 Psychosocial Counsellor, 2 Community Promoter male and female) serving underserved areas in the Pul Alam, Baraki Barak, Kharwar and Azra districts. The MHNTs worked in the areas beyond the reach of the existing health facilities as part of Mobile Health and Nutrition activities. The MHNTs were greatly needed because the existing BPHS did not have any MHNTs while there was drought affected population in the white areas who needed to be served for health and nutrition services.

In the view of this, the MHNTs tackled both supply side and demand side factors. On demand side aspect, they strengthened utilization of community-based nutrition interventions. On supply side, they offered, emergency care, assessment and diagnosis, pre-treatment of SAM treatment of acute malnutrition of MAM, follow-up assessment of nutrition situation and screening and growth monitoring of all under five children. The team also involved mothers in improving the nutrition of their children.

In addition, totally 50,230.00 women, girls, men, and boys were provided nutrition, immunization, Primary Health Care, mental health and psychosocial support services and improved awareness on health and nutrition. The below table shows the number of clients with type of services they received.

SN	Indicators	Target	Achievement
1	Number of children aged 6-59 months with SAM in humanitarian situation who are admitted for treatment	2000	827
2	Number of boys and girls (6-59 months) admitted in OPD-MAM program.	4500	1240
3	Number of pregnant & lactating women admitted in OPD-MAM.	3750	178
4	Number boys and girls (24-59 month) receiving deworming	3500	2315
5	Number of children Under 5 receiving Vitamin A supplementation	20000	0
6	Number of children 6-59 months in humanitarian situations who are vaccinated against measles	2000	23
7	Number of Primary Health Care outpatient consultations supported for children (boys and girls) under 5	25000	15567

8	Number of Primary Health Care outpatient consultations supported for CBA women including PLWs	5500	14723
9	Number of caregivers including pregnant and lactating women (PLWs) counselled or reached with awareness on appropriate infant and young child feeding (IYCF)	6000	4452
10	Number of caregivers benefiting from H&N educations sessions conducted about essential care practices	5000	8576
11	Number of boys and girls, adolescents and caregivers received mental health and psychosocial support services	5000	2329

Social Behaviour Change

ORCD was awarded the project of Social Behavior Change (SBC) by the UNICEF on June 09, 2022 for one year duration. The project has been implemented in Balkh, Jawzjan, Baghlan, Kunduz and Takhar provinces the north of Afghanistan with the goals; 1) Beneficiaries engaged in community dialogue around key selected interventions about health, nutrition, Education, child protection, WASH and demand & utilize the services in Kunduz, Balkh, Takhar, Jawzjan and Baghlan Provinces, 2) Community platforms/networks members acquired knowledge and skill on community engagement of key interventions (health, WASH, Nutrition, COVID-19 prevention and vaccination in Kunduz, Balkh, Takhar, Jawzjan and Baghlan Provinces, 3) Individuals, families and communities, including, girls, females and people with disabilities are aware of feedback communities' channels and share their queries, concerns, complaints and issues about Unicef interventions in Kunduz, Balkh, Takhar, Jawzjan and Baghlan Provinces. The main achievements in 2022 were.

- 37,385 affected community people engaged in two-way community dialogues on key behaviours.
- 1,883 engagement session conducted with community network groups.
- 219,594 people reached with key behaviour change messages and lifesaving information on humanitarian situations.
- 214 community engagement sessions conducted in Information Feedback Centres
- 5,379 people reached through community engagement sessions conducted in Information Feedback Centres
- 735 community members, influencers attended the session reached with messages/information necessary of feedback.
- 1,154 community leaders (women and men) capacitated on PSEA prevention and response, and AAP
- 15 Information Feedback Centres established and functional in Balkh, Jawzjan and Kunduz
- 23,734 feedback, complaints, and queries received and shared in the Information Feedback Centres
- 9,188 of responses feedback to the communities' complaints
- 80 trainers and 40 social mobilizers were provided ToT.
- The training was cascaded and trained XXX of Health workers, social workers, CPAN, CBE, members of CPAN, CHW, SMS, NC, RL, CDC, Community Shura, CLTS, and Head/Representative of governmental department (Balkh = 54, Jawzjan = 112, Baghlan = 60, Takhar – 76).

CASCADE Trainings about AAP at Baghlan Province

To contribute to the control of Acute Watery Diarrhoea /Cholera and Measles outbreaks through strengthening the community actions and adopting preventive behaviours

With financial support of UNICEF, ORCD implement the project of Social Behavior Change (SBC) for four months duration effective from September 01, 2022 in 15 districts of three eastern provinces including Kunar, Laghman and Nangarhar. The project was designed to control and prevent the outbreaks of the communicable diseases of Measle, Acute Water Diarrhea/ Cholera, COVID19, Dengue and other communicable diseases by positive changing of behavior of the community.

Main achievement of the project was:

- Achieved 13500 community engagement sessions.
- Reached 135000 reach sessions in 15 districts of three provinces.
- Trained 3750 front line workers of 15 districts of three provinces through cascade trainings.
- Achieved 154719 of reach through volunteers verses 135000 targets.
- obtained 16414 community engagement sessions through social mobilizers verses 13500 targets.
- 39 newly haired staff (3 field supervisors, 30 volunteers, 6 social mobilizers) of Nangarhar,

Figure 2: Training for staff

Kunar and Laghman provinces were trained on Wash, Health, Education, Nutrition, Child Protection, Community Engagement and Interpersonal communication for three days.

- 3750 front liners of various community structures (1750, 50, 442, 246, 662, 405, 195 respectively of CHWs, CHSs, LHCs, SMSs, YCs, RLs, and Influencers) were trained in Laghman, Kunar, and Nangarhar provinces.
- Community engagement sessions were conducted to 161,414 people (Laghman= 3777, Kunar = 3522, Nangarhar = 9115) of targeted community-based structures (CHWs, CHSs, SMSs, YCs, RLs) verses 13,500 target (Laghman= 2700, Kunar = 2700, Nangarhar = 8100).
- To 154,719 people (Laghman= 29743, Kunar = 34762, Nangarhar = 81000) reach sessions were conducted verses 135,000 targets (Laghman= 27000, Kunar = 27000, Nangarhar = 81000) in three provinces.

Figure 3: Community Engagement in Laghman

Provision of Ramadhan Food Packages to vulnerable IDP families in Kabul, and Vulnerable families in Baghlan provinces

ORCD was awarded a project by Muslim Aid UK (MAUK) for Provision of Ramadhan Food Packages to vulnerable IDP families in Kabul, and Vulnerable families in Baghlan provinces. The objective of the project was, to meet the needs of food security and nutrition of IDPs and underprivileged host community members in informal settlements of Kabul city and Baghlan (Doshi) during the month of Ramadan. The target population of the project was the 280 IDPs who were displaced from their place of origin due to the insecurity caused by the conflict between the Taliban and government forces, and the vulnerable families.

The project had a significant positive effect on the lives of the IDPs in Kabul, and vulnerable families in Doshi of Baghlan province. With the generous support of Muslim Aid UK, ORCD was able to distribute food items among 280 IDPs and underprivileged host community members in informal settlements of Kabul city and Baghlan (Doshi) during the month of Ramadan. The result was that sufficient food packages were provided to 280 poor families, internal displaced population (IDPs), returnees and improvised host families) to maintain their health and nutritional status during the month of Ramadan and provide them an opportunity to celebrate the Eid-ul-Fitr festival.

Insert pictures

Life-saving support to the Vulnerable flood-affected population in Logar Province

ORCD signed a contract with the Muslim Aid UK (MAUK) for life-saving support to the vulnerable flood affected population in Logar province. On the 20th August, 2022, severe and fatal floods hit the various provinces of Afghanistan including Logar, Wardak, Paktya, Nangarhar Provinces. These floods ruined thousands of houses, killed dozens of people including infants, children, women, and men, killed thousands of animals, demolished hundreds of thousands of agricultural lands including orchards and cultivated land. Logar province was one of the provinces which was very strictly hit by the flood that have caused extensive financial and personal losses. The most damaged districts were the Khoshi and Mohammad Agha districts. However, the floods hit all the districts and inflicted huge losses to the residents of the Logar province.

The main objective of the project was to distribute food parcels and Non-food items (NFI) to make sure that the flood-affected population in Logar province have access to food and NFI. The provision of Food and NFI will also address the most urgent emergency needs of the flood-affected people during the winter season who have already badly affected in an already extremely fragile country.

The main achievements of the project were the mobilization of the already established 50 Community Development Councils (CDCs) and establishment of new 46 CDCs, 3 Guzar Assemblies (GAs), and 2 Business Guzar Assemblies (BGAs).

{Insert picture}

Emergency Relief for the Earthquake affected People in Paktika Province

ORCD was awarded a contract for support of earthquake-affected Population in Gyan of Paktika Province by Muslim Aid UK (MAUK). A strong earthquake of magnitude 5.9 occurred on June 22nd, 2022, in Khost and Paktika provinces of the country which killed and injured more than 1000 people in the remote villages of Gayan, Barmal and Spera. In addition, hundreds of traditionally mud-made houses were razed to the ground making the residents families homeless and forcing them to displace to other locations without having any means for housing or shelter. The affected areas are some of the poorest and remote regions of the country who do not have any resources to withstand natural disasters. To provide emergency relief support for the earthquake affected population in Gayan district of Paktika Province, ORCD with funding from Muslim Aid assisted 140 earthquake-affected families with emergency food, non-food, and dignity shelter items. ORCD was able to distribute food and non-food items among 140 HHs, who were living in vulnerable situation. Under this project the vulnerable earthquake-affected families in Gyan were able to meet their immediate needs in terms of food and NFI.

{inset pictures}

Feed Our World (FOW)-Ramadan Food Distribution

ORCD was awarded a contract by the Penny Appeal UK (PAUK) for Feed Our World (FOW) Ramadan Food Distribution. The main objective of the project was to address the food security and nutrition needs of 85 IDP and host families living in Kabul City during the month of Ramadhan. The target

population of the project were the, IDPs, returnees and poor host families to lead nutritive life of Qambar Square, Ahmad Shah Baba Mena, and Parwan-e- Doo of Kabul city. during the month of Ramadan.

The main achievement of the project was distribution of the food items among 85 targeted vulnerable IDP families to meet their needs for food items for the last 10 days of Ramadhan with the financially support of Muslim Aid. This intervention was an endeavor to reduce the level of food dependency of vulnerable families on rich families as well as to keep children of the targeted families from begging in the streets, child labor and other unwanted acts.

{inset pictures}

Afghan orphans support program through one-to-one sponsorship

The project was funded by Penny Appeal UK (PAUK) and implemented by ORCD all over the country. The beneficiaries were the orphans who lose one or both parents and have been living desperately in a vulnerable situation, and do not have access to education. They needed care and assistance to thrive and receive an education.

These children didn't have access to education and a suitable place to live because they do not have guardian, so they couldn't have other option rather than to get enrolled in Madrasa or Hifz School which are usually free of charge. They couldn't afford access to formal education in schools because their mothers or other guardians couldn't afford uniforms or clothing, nutritious meals, healthcare, stationery, school fee, and others. The main aim and objective of the project were to transform the lives of orphans by empowering them to have access to education to play a productive role in building Afghanistan. Per the project, 900 vulnerable orphans were provided with a monthly stipend to meet their needs such as school fees, uniforms, clothes, stationary, nutritious meals, and essential healthcare.

{insert pictures}

Women Protection Center (WPC)

With the financial support of UN-Women, ORCD implemented the project Women Protection Centre and Family Guidance Centre (WPC/ FGC) in Baghlan province in the north of the country. The overall goal of the project was to protect women from gender-based violence. The project was implemented in line with the overall efforts of UN Women working to increase protection for Afghan women and girls from violence, sexual exploitation, and other human rights violence, as well as gender-based violence through access to justice including legal representation & counselling & mediation, social protection services, capacity building & training, awareness raising and community mobilization through supporting Women Protection Centers, Family Guidance Centers and EVAW High Commission & Provincial Commissions.

Following the political change in the country, the modality of the project was changed minorly after short term shutdown in the functioning of the WPC by taking permission from the de facto authorities. The project activities were limited to the provision of Psychosocial Counselling, Literacy classes, and some Vocational trainings to the clients. However, for reasons due to re-design of the project, ORCD slowed down and even temporarily put on hold many of the activities pending the final decision for UN Women is working with other partners to bring changes in the modality of the WPC.

{insert the pictures}

Family Guidance Centre/Family Resource Centre (FGC/FRC)

ORCD was awarded the project Family Guidance Centre/Family Resource Centre (FGC/FRC) by the UN Women. The Family Resource Center (FRC) is proposed to initially focus on being a place for all women to obtain a range of information, services and referrals including vocational training, economic empowerment, Islamic studies, literacy training and other educational opportunities, psycho-social support, and counseling for themselves (or families) and health information. Services will be provided through direct provision of services or referral to other services. After the transition of the government particularly the recent decree of banning the women to work has badly affected even stopped the FRC activities. With all the challenges and obstruction, ORCD succeeded to conduct the following activities:

- Regular PSS counseling sessions for referred clients.
- Follow up the PSS cases on regular basis (weekly and bi-weekly)
- Awareness sessions
- Conducted individual awareness raising sessions on women rights.
- Coordinated FRC activities with other organizations which were working for GBV.
- Maintained regular attendance and reporting mechanism.

Figure 1: Psychosocial counselling to the client in Balkh Province

Integrated Community Resilience Action

Through implementation of Integrated Community Resilience Action (ICRA) project, currently critical situation for water scarcity with high demand for clean water and hygiene in selected areas improved. There is a decreased strain on the urban water system where people came from rural areas and rural water systems faced stress as it now returned reasonable where water scheme planned to be constructed. In the meantime, there is also a decreased risk of deteriorating hygiene and sanitation conditions which resulting in a sharp increase in malnutrition and diseases such as cholera, particularly in urban and informal settlements.

Similarly, project alleviated the critical humanitarian context stems which primarily was because of widespread food insecurity; thus, leading to increased poverty and economic fragility. Extreme weather and climatic shocks, land degradation, and decades of conflict have limited the spread of essential public services and safety nets. While the agriculture and enterprise sectors support brought sufficient changes in Helmand and Nimruz caused investment and good productivity, other economic sectors such as construction and services have improved where aid flows have taken place. Pervasive gender equalities have upgraded caused women's economic opportunities, contributing to household food security in selected areas.

ORCD in partnership with NCA supported basic human needs through lifesaving measures in addressing urgent humanitarian needs while concurrently enhancing access to food, water and income-generating opportunities of vulnerable-shock affected communities, particularly women and other marginalized groups. Against the backdrop of do-no-harm, the intervention mainstreamed

community engagement, women's empowerment, disaster risk reduction and strengthen social cohesion while ensuring that all activities are conflict-sensitive supporting peacebuilding initiatives.

Overall performance against specific indicators:

Indicator (From AIMS)	End targets	Actual (cumulative)
# of schools with solar powered lighting system with charging stations	8	8
# of health centres with solar powered lighting system with charging stations	12	12
# of handwashing facilities installed in targeted schools	56	56
# of handwashing facilities installed in targeted health centres	72	72
# of electricians trained	40	40
# of electricians provided with toolkit	40	40
# of sex-segregated sanitation facility constructed in targeted schools	8	8
# of sex-segregated sanitation facility constructed in targeted health centres	8	8
# of solar powered water pipe scheme & reservoir constructed in targeted schools	2	2
# of solar powered water pipe scheme & reservoir constructed in target health centres	2	2
# of COVID19 wash kit distributed in targeted schools & health centres	2111	2111
# of targeted women & men provided with micro-greenhouse	95	95
# of targeted women & men provided with vegetable support kit	95	95
# of targeted women & men provided with gardening tool kit	95	95
# of targeted women & men provided with drip irrigation kit	95	95
# of targeted women & men provided with agriculture support kit	95	95
# of targeted women & men provided with poultry production starter kit	102	102
# of targeted women, men & youth trained in horticulture & climate smart agriculture	100	95
# session of horticulture and climate smart agriculture training conducted	10	10
# of HH in high poverty receiving unconditional cash	1184	1163
# of men involved in cleaning debris, obstacles, road, and public place through CfW		1165 in first round +1500 in second round for the unspent portion of budget
# of women involved in cleaning debris, obstacles, road, and public place through CfW	60	60
# of existing women-led, youth-led micro enterprises and informal business supported with cash grant	10	33
# of women & youth trained in microenterprise, marketing, and bookkeeping	97	178
% of women & youth led microenterprises who report supporting their families through their income generation	50%	50%
# of CBDRRM committees established with disaster plans	20	20

Indicator (From AIMS)	End targets	Actual (cumulative)
# of training sessions on disaster preparedness conducted to members of CBDRRM committees	40	40
# of CBDRRM committees receiving CERT Kit	20	20
# of flood protection walls constructed	24	24
# of skilled worker involved in the construction of flood protection wall thru CfW		115

# Of training provided to local shuras	40	40

Provision of emergency Shelter/Non-Food Items and Health services through existing HFs in Kabul, Kunar and Baghlan Provinces.

ORCD was awarded the project of provision of emergency Shelter/Non-Food Items and Health services through existing HFs in Kabul, Kunar and Baghlan Provinces by for a duration of 5 months effective March 01, 2022.

The project key achievements were.

- ORCD registered the project with the MoEC, signed MoU with the MoRR and sent the introduction letter to all relevant departments for the cooperation.
- ORCD conducted the survey from the vulnerable.
- The vulnerable list was prepared and shared with DoRR and the distribution has been scheduled and the distribution team was assigned.
- Emergency relief was provided to 230 households in Kabul, Baghlan and Kunar provinces.
- COVID-19 awareness materials were collected from MoPH HP department and printed and distributed.
- Orientation and awareness were given through ORCD's medical staff.
- Main cause of malnutrition and anaemia are worm infestation and micronutrient deficiency. So, ORCD provided deworming items and sprinkle powder to the baby which is the standard formula of Public Nutrition Department of MoPH for the Basic Supplementary Program (BSFP).
- ORCD provided Iron Ferrous Sulphate and Folic Acid to prevent Iron deficiency anaemia and Megaloblastic anaemia in pregnant and Lactating women (PLWs).

- Reference to the MoPH policy, each child and woman prevented worm infestation by provision of one dose anthelmintic medicine.
- 690 households were provided food and non-food items.
- Following are the achievements on key indicators

SN	Indicators	Target	Achieved (Total)
1	Number of people provided with Emergency support by Muslim Aid	6024	6047
2	Number of households provided with basic inputs for survival, recovery, or restoration (NFI, hygiene kits, food and medicine)	753	753
3	Percentage of beneficiaries reporting that humanitarian assistance is delivered in a safe, accessible,	753	753
4	A total 230 persons receive hygiene kits and Food kit during the project	293	293
5	A total 690 household receive COVID19 awareness for the prevention	753	753
6	A total 230 (12-59 months) children are Dewormed	230	230
7	A total 230 (6-23 month) children receive sprinkle powder	230	230
8	A total 230 lactating and pregnant Iron deficiency anaemia women treated	230	230
9	Medicine distributed to 43 existed Health Facilities	43	43
10	A total 230 households receive NFI kits during the length of project	230	230

Support to Women-led, women-managed Informal Businesses in Mazar -e Sharif Province

By financial support of United Nations Development Program (UNDP), ORCD implemented the project of support to women-led, women-managed informal businesses in Mazar -e Sharif of Balkh province. The project duration was four months effective January 01, 2022 with the goal "to improve 1,000 women-led, women-managed informal business by providing micro-grants on need basis in Mazar e Sharif." All planned 1,000 women-led, women managed informal businesses were screened and selected using the criteria introduced by UNDP.

Following development of a comprehensive questionnaire and taking approval from the donor the selection of beneficiaries was done across all 12 districts of Mazar city based on solid screening criteria. 1104 women-led small businesses were identified out of which 1000 most eligible small businesses based on UNDP's beneficiary selection criteria were selected. The main achievement was cash distribution to a total of 1000 women led informal business
